# Music

The intelligent wireless music system that automatically learns what you want to listen to, and how you want to listen to it

### NoiseAdapt

Compensates  
for varying noise  
levels in your room

### RoomAdapt

Optimises  
performance for  
any room position

### Music Now

Instant intelligent  
playlists of only the  
music you love

### All-in-one

Plug it in and  
you're ready to go.  
It's that simple

# Adapts to your room

It doesn't matter if the speaker is in a corner, up against a rear wall or in free space: its built-in **RoomAdapt** technology senses where it's been placed and continually optimises the speaker to deliver the best performance possible. You'll hear it most in the clean, accurate bass and midrange.

Best of all, you can move your Music whenever – and wherever – you want. It will sense its new position and optimise itself automatically.

Music 5

# Adapts to your party

All the speakers in the Music family actively sense the vibe in the room... and then they roll with it.

Sudden party? Music's **NoiseAdapt** technology will adjust volume and tonal balance intelligently so all the important details in your songs shine through. Sudden silence? It can handle that too – and you don't have to touch a remote control or fiddle with a single button.

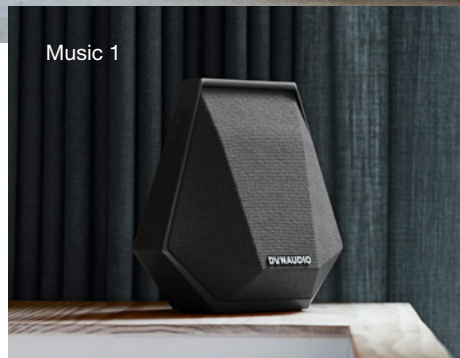

# Adapts to your personality

Music 3

The intelligent **Music Now** algorithm learns your musical tastes and plays automatically generated playlists with one touch of a button on the speaker.

Set up your personal profile (or even multiple profiles for yourself, your friends and your family) from the free Dynaudio app and you're up and running instantly.

Music 1

# Just push play

Download the free Dynaudio Music app  
to set up your new speaker and get listening.  
Every Music speaker comes with TIDAL  
in the box, so you can start straight away.
